Daily Weather Threat Briefing

Regional Operations Center

Western Region

Thursday, June 9

9:00 AM PDT

Day 1 (Thursday): Temperatures continue to trend even hotter for many inland areas today, with moderate to locally high heat risk impacts. Breezy winds will also bring locally elevated fire weather conditions near the higher terrain.

Weather Risk Outlook

Wind			Inland/ Southern	Inland/ Southern	Southern		
Heavy Rain Flash Flooding / Debris Flow							
Snow							
Coastal Flooding							
Risk Levels	Little to None		Minor		Major		Extreme

Weather Key Points

Regional Operations Center

Western Region

Thursday, June 9

- Temperatures will see a considerable warming trend Thursday through Saturday for many areas of the state, particularly for those locations just inland away from the water
 - Daytime high temperatures of 100 to 105 are expected across much of the Central Valley, peaking on Friday, while many southeast desert locations see highs of 105 to 115 degrees. High to very high heat risk impacts are expected, with record-setting high temperatures also likely in some areas.
 - Even locations closer to the coast will see moderate heat risk impacts on Friday, with readings warming into the 90s
- Similar to many recent days, afternoon winds will remain breezy across many mountain and foothill locations through Friday, bringing locally elevated fire weather conditions. Stronger winds could develop across more of the state for the weekend and early next week, bringing the possibility for areas of critical fire weather, though the exact details remain uncertain.
- Mainly dry weather will persist for much of the state through the weekend and first half of next week, with the exception of far northern California where a few rounds of showers and occasional thunderstorms are expected later Friday night through Sunday night
 - Rainfall amounts will be mainly light but could be locally heavier in and around thunderstorms
 - No widespread significant runoff concerns are expected at this time

Thursday

Friday

Saturday

Note: Forecast precipitation amounts are an average for any particular location. Thunderstorms may produce locally higher rainfall amounts.

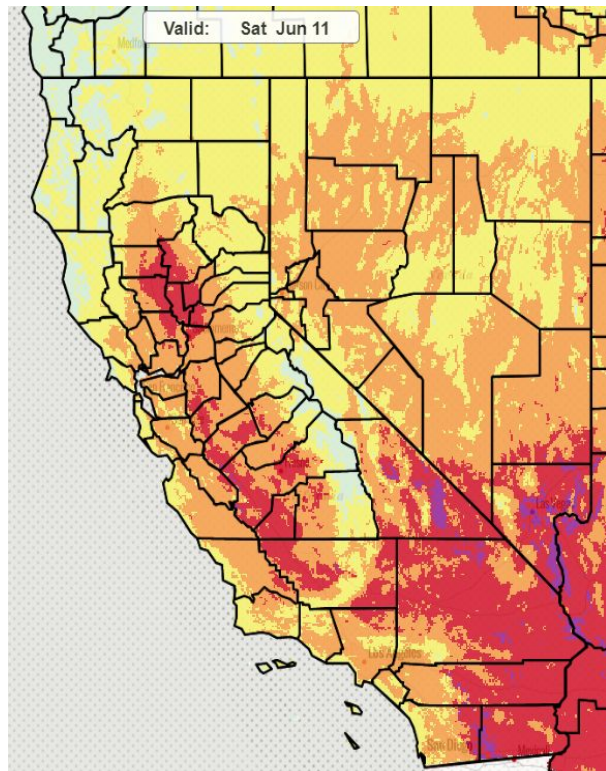

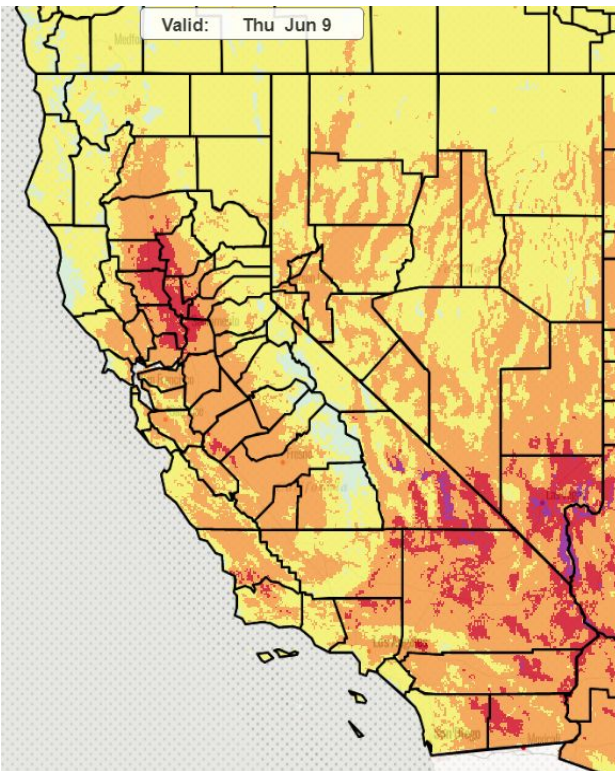

Precipitation (inches)

Heat Risk

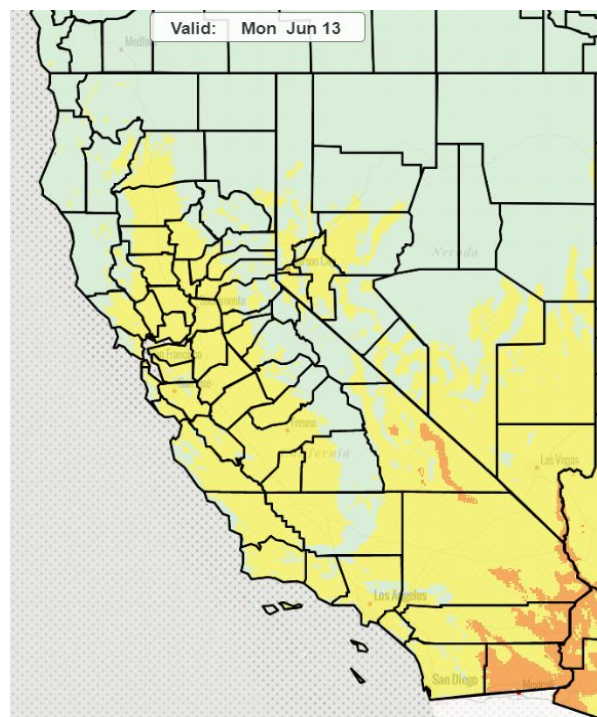

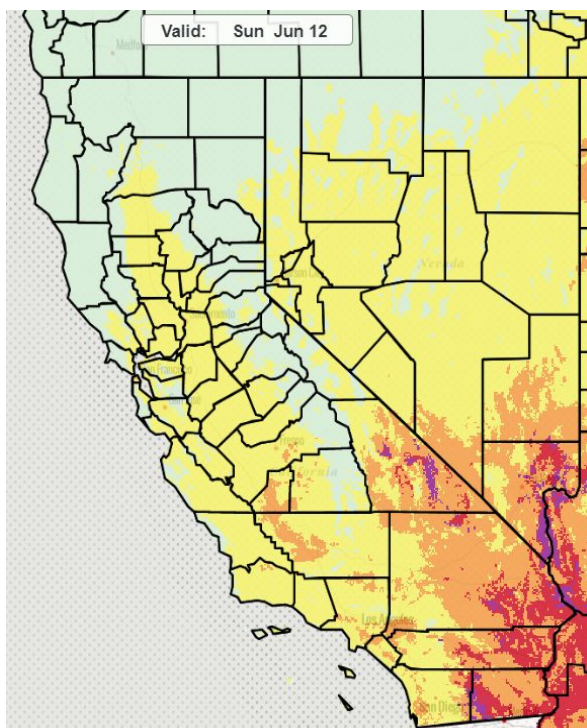

Regional Operations Center
Western Region
Thursday, June 9

Green	Level 0	No Elevated Risk
Yellow	Level 1	Low Risk for those extremely sensitive to heat, especially those without effective cooling and/or adequate hydration
Orange	Level 2	Moderate Risk for those who are sensitive to heat, especially those without effective cooling and/or adequate hydration

Red	Level 3	High Risk for much of the population, especially those who are heat sensitive and those without effective cooling and/or adequate hydration
Magenta	Level 4	Very High Risk for the entire population due to long duration heat, with little to no relief overnight

Heat Risk

Green	Level 0	No Elevated Risk

Weather Outlook (6-14 Days)

Regional Operations Center

Western Region

Thursday, June 9

6-10 Day Outlook (June 14 - June 18)

Temperatures

- Above normal temperatures are favored to continue across central and southern California, with below normal temperatures slightly favored across the far north

Precipitation

- Near normal precipitation is favored for the majority of the state

8-14 Day Outlook (June 16 – June 22)

Temperatures

- Below normal temperatures are favored for much of central and northern California, with above normal temperatures slightly favored over far southern portions of the state

Precipitation

- Near normal precipitation is favored for most locations, except for areas near the Oregon and Arizona borders where above normal precipitation is slightly favored

Risk Assessment Matrix

Western Region

Thursday, June 9

Impact Level Definition

- 1. Impactful weather is not expected.**
- 2. Potential threat to lives and property if no/incorrect actions are taken.**
 - Localized impacts on commerce possible.
 - Includes events that occur frequently.
- 3. Potential threat to lives and property if no/incorrect actions are taken.**
 - Impacts on commerce possible.
 - Includes events that occur a few times per year.
- 4. Actions likely needed to save lives and/or property.**
 - Significant impacts to commerce possible.
 - Includes events that occur infrequently.
- 5. Actions required to save lives and/or property.**
 - Significant and extended impacts to commerce.
 - Includes exceptionally rare events.
